INTRODUCTION.

A REVIEW.

As this is the last volume of this series for which the present editor will be responsible a few lines on the progress of the Index up to the present time may not be out of place.

Dr. Francis Collins, to whose industry and patience the Index owes so much, issued a catalogue of Yorkshire Wills and Administrations at Somerset House covering the period 1649-1660 in 1885. He then turned his attention to the Wills proved in the Prerogative and Exchequer Courts at York, his first volume dealing with the unregistered Wills, 1636-1652, was issued in 1888. In the following year the earliest volume, in chronological order, 1389-1514, appeared, including, as in succeeding volumes, both Wills and Administrations, and covering registers 1 to 8. An appeal was then made for funds to employ a professional indexer, £348 in all being raised. Mr. Alfred Gibbons took up the work, and in 1891 another volume, 1514-1553, was issued. For this volume Dr. Collins indexed registers 9 to 12, and Mr. Gibbons registers 12a and 13, and the corresponding Acts for registers 9 to 13. Dr. Collins also edited this volume and all the others which Mr. Gibbons indexed. Mr. Gibbons indexed five more volumes, covering the years 1554 to 1611, before the available funds were exhausted. Dr. Collins came to the rescue and indexed and edited two more volumes of Wills and Administrations, 1612 to 1627, and a third containing Wills, 1627 to 1637, with the Administrations, 1627 to 1652, the index to the Wills for the latter part of this period, 1636-1652, having been printed in 1888. This completed Dr. Collins' work on the main index, but he also published a volume of Index to the Registers and original documents in the Dean and Chapter's Court, 1321 to 1724. In all, Dr. Collins edited thirteen volumes of index and in this painstaking work he was much assisted in sorting the slips by his daughter.

The present editor took up the work where Dr. Collins had left off, and has continued it on the same lines. His first volume, covering the period 1660 to 1665 was printed in 1913. He has completed three further volumes, 1666 to 1688, the last of them including the two vacancies, June to Aug. 1683, and April 1686 to Dec. 1688, during which all grants were made in the Court of the Dean and Chapter. The first 60 registers and the corresponding Act Books for the Prerogative and Exchequer Courts of York, coming down to the year 1688, have now been indexed. The present editor has also been responsible for a fifth volume containing an index to the Consistory Wills, etc., 1427 to 1658 and to the Act Books of the peculiar of the Dean of York, 1604 to 1722.

PREFACE.

Included in this volume is the index to Vols. 59 and 60 of the Registers of York Wills proved in the Exchequer and Prerogative Courts, and to Vol. 1 of the Registers of Wills proved in the Court of the Dean and Chapter during the vacancies of the See, with the corresponding Acts. There are, however, large gaps in the registering. With a few exceptions, similar to those occurring in the earlier registers, it is apparently complete down to the end of 1684, including the vacancy June to August, 1683, when the wills are to be found in the Vacancy Register. Then there is no registering from the beginning of 1685 to the commencement of the next vacancy in April 1686. During this period the searcher must rely on the Probate Acts to be found in the Act Books. During the vacancy from April 1686 to December 1688 many wills are unregistered and after April 1686 no more Acts are available, but the original documents may be referred to in most cases until the end of June 1688 after which date to the end of the vacancy in the following December there is no registering of wills, there are no Act Books, and no original documents extant.

The total number of references in this volume is about 9987.

PART I.

THE PREROGATIVE AND EXCHEQUER COURTS.

Except when litigated nearly all Wills were proved locally. In the Prerogative, as in the Consistory Court, a special commission, which is often found amongst the papers, was issued, generally to some neighbouring clergyman, to prove the will or to grant administration, and he returned the documents into the Court. In the case of the Exchequer Court the wills were proved by the Rural Dean, who had a commission for that purpose from the Commissary of the Exchequer Court, of which the following is an example :—

“Mar. 19 1556. Mr. John Herryson, S.T.B., and Vicar of the Church of Hallifaxe, was appointed Dean to prove the wills of all testators and to commit administration of those dying intestate within the whole parish of Hallifaxe aforesaid and to do further as appears by a commission directed to him in that behalf, etc.”

The Rural Dean having granted probate or administration, as the case might be, periodically returned the documents into the Court. The grants were then entered into the Act Book of his particular deanery and the wills were copied into registers. All

the original documents referring to a particular probate or administration are normally kept together in one bundle, though occasionally odd ones may have gone astray. They usually comprise in the case of a probate, in addition to the will, which is always on paper except in a few cases where the original has for some cause been returned to the executors when a copy has been kept on parchment, the inventory of the deceased's effects taken within a day or two of his death, and the bond signed by the executors and their sureties for the due performance of the will. Occasionally there may be a renunciation of administration. When the children were under age there are curation or tuition bonds and very occasionally the record of a choice of tutor. Rarely, accounts of the executors are found. With the exception of the will and the substitution of a bond for due administration of deceased's effects the same documents may be found in the case of an intestacy.

This volume contains references to the testamentary documents of Archbishops Dolben and Sterne, Guy, Bishop of Chichester, Henry Bridgeman, Dean of Chester and Bishop of the Isle of Man; and amongst laymen, to the notorious George Villiers, second duke of Buckingham.

Interesting details occur sometimes, even in an Index. Thomas Wright dies in his journey to London; others abroad, *e.g.*, at Copenhagen, Kneiphoff, Rotterdam, or elsewhere. Henry Nicholson desires to be buried in the "schoole house of St. Mary church" (Scarborough); Christopher Crosby "in the burying place in my garth"; Nicholas Hopperton in "the burying place of freindes in the Truth"; the two last named almost certainly Quakers. Thomas Man is Doncaster's serjeant at mace; John Walker is keeper of Woollerton park; Leonard Bushall is "Master of the good ship or vessell called the Mary of London." Archaic descriptions include ale keeper, allebladesmith, boatewright, dishturner, horne cupturner, musitioner, plowwright, sheather, skean worker, silke stocking frame knitter, woodmonger, and woodsawer. Robert Greggs of Kingston upon Hull is described as a "tidsman," interpreted by the *N.E.D.* as an officer appointed to inspect the loading and unloading of ships to prevent contraband transactions.

Uncommon Christian names are Abednego, Anastace, Benoni, Ceziah, Cheanie, Collebra, Feareuer, Latham, Milcah, Rabanks, Somersall, Standup, Wastel and Whatgodwill; and among surnames, occur Barterman, Boos, Brandiron, Fallbeard, and Lightharness.

THE RE-INFECTA WILLS.

The index to these is a continuation of that printed as Appendix III in Vol. XLIX of the Society's Record Series.

PART II.

THE VACANCIES.

During the vacancy of the See the Wills and Administrations, for which grants would, in the ordinary course, have been made in the Prerogative and Exchequer courts, came under the jurisdiction of the Dean and Chapter's court, until the restitution of the temporalities to the new archbishop. The Vacancy Register for 1683, and 1686-8, indexed in this volume, is the first separate register we have for Prerogative and Exchequer Wills proved during the vacancy of the See. Previously these wills appear to have been entered in the same registers as were used before the functions of these two courts were suspended. A separate Act Book for grants of probate or administration is more often found. There are separate Act Books for the vacancies in 1530-1, after the death of Archbishop Wolsey, and in 1544-5 after the death of Archbishop Edward Lee. The administration grants from these Act Books are printed in Vol. XI of our Record Series. Then there are separate Act Books for the vacancies in 1559-61, after the deprivation of Archbishop Nicholas Heath, and in 1568-70 after the death of Heath's successor Archbishop Thomas Young, the administration grants from these being indexed in Vols. XIV and XIX of the Record Series. So far as it has been possible to ascertain there are no further separate Act Books until we come to the vacancies dealt with in this volume, in 1683 and in 1686-8, the last of which only covers the month of April 1686.

The two vacancies included in this volume of Index cover the periods June to August 1683, and April 1686 to December 1688. The first was caused by the death of Archbishop Richard Sterne on 18 June 1683 and ended on the restitution of the temporalities to Archbishop John Dolben in August of the same year; the second by the death of Archbishop Dolben on 11 April 1686 and terminated by the restitution of the temporalities to his successor Archbishop Thomas Lamplugh, who did homage on 9 Dec. 1688. The following table gives the dates of the last grant made in each deanery before the occurrence of the second vacancy, and of the first grant made in each deanery after the restitution of the temporalities to the new archbishop.

PREROGATIVE COURT	8 Apl. 1686	18 Dec. 1688

As might be expected the Prerogative Court was the first to function after the restitution of the temporalities, whilst in the case of the Exchequer Court it was nearly two months before some of the rural deans in the more remote parts of the diocese sent in their first batch of testamentary documents.

THE VACANCY RECORDS.

The documents for the two vacancies comprise (1) a register of wills, (2) an imperfect act book, and (3) the original testamentary papers, bonds, etc.

(1) The Register.

The Register has evidently been rebound and largely re-written at some time, many of the original leaves being missing. The numbering in the first instance was by folios, but on rebinding this was changed to a numbering by pages, some of the old enumeration being left. The first 120 pages are so marked, the old foliation being missing, but pages 111 to 120 are left blank. The same pagination is continued, but with the old enumeration by folios as well, beginning on page 121 (folio 77) up to page 128 (folio 80). Then there is a gap in the old enumeration, page 129 being folio 85; then without a break with both enumerations to page 303 (folio 172), after which there is another break in the old numbering, beginning again, however, on page 306 (folio 175) to page 319 (folio 183). From page 320 to page 485 there is only the second numbering. Thus only folios 77-80; 85-172; and 175-183 remain of the original register, the rest having been re-copied, but this has never been completed as evidenced by the blank leaves and the number of wills which are not registered.

(2) The Act Book.

The Act Book, which is very incomplete, has been used also for an Index to the wills, etc., in the normal jurisdiction of the Dean and Chapter of York. At one end of the book is what appears to be an almost complete list, without full details, of the grants

made during the Vacancy, April 1686 to June 1688, and no further (fol. 1-39). Folio 40 is blank. Then follows an Index to the Wills, etc., in the peculiar of the Dean and Chapter of York, 1650-1756 (fol. 41-104). At the other end of the volume are the acts for the Vacancy, June to Aug. 1683 (fol. 110-134), and for the month of April 1686 (fol. 104-109), after which no record of any later grants during this Vacancy can be found.

(3) The Original Documents.

The Original Documents for the Vacancy, 1686-1688, are of more than usual importance, as except for the month of April, there are no acts for this period and many of the wills are not registered. Up to the present they have been consultable by means of the index on folios 1-39 in the Vacancy Act Book. They are kept in boxes, each of them containing the grants for one month.

(3) The Missing Records.

Attention has already been drawn to the absence of any records from July to December 1688. In the box containing the original documents for June 1688 is a small bundle labelled "Pieces of paper torn by the rats from wills, etc., proved during the Vacancy 1688 proved principally it is supposed in the month of June." The number of documents preserved for the month of June is very small, but could rats alone account for the total disappearance of testamentary records of every kind for the months July to December, or could it have been due to the indifference or neglect of the custodian or to some other cause? The Editor is inclined to think that the list of grants contained in the Act Book is not a contemporary one.

It only remains for me to thank the President of the Probate Division for permission to continue the Index, and the officials of the York Probate Registry for their unfailing courtesy and help.

WILLS IN THE YORK REGISTRY.

PART I.

Wills proved in the Exchequer and Prerogative Courts, A.D. 1681 to 1684.

The date of the Probate precedes the Name and that of the Will follows the Name, the reference to the Register and folio follows the latter. Where the dates of Probate are not given in the Register they have been supplied from the Act Books, being placed within square brackets. Additional matter from the Act Books is also given within square brackets.

PART II.

Wills proved in the Dean and Chapter's Court during the Vacancy of the See.

A.D. 1683; and 1686 to 1688.

The exact date, or the month in which the probate was granted precedes the Name. When the actual day is given it is taken from the Register, which, however, only occasionally notes the date of probate.

The original documents are put up in cardboard boxes, each of which contains those of a single month. This arrangement supplies the month and year in which the probate was granted, in those cases where it is missing in the Register. This information, and also some additional matter relating to the testator found in the original documents, is printed within square brackets.

APPENDIX IV.

VACANCY.

Index to the Original Documents.

May 1686 to June 1688.

For the Vacancy 1686-1688 there are no Wills registered, or Acts recorded, after the first month, April 1686. This Index is compiled from the original Documents still preserved, beginning with May 1686 to June 1688, after which date, until the end of the Vacancy in Dec. 1688, there are neither registered Wills, recorded Acts, or original Documents.

The original Documents are now preserved in boxes, the date at the beginning of each entry being the reference to the box in which the particular Documents are contained. All the items referring to a single grant are usually wrapped up in the same bundle, but in those cases in which a Document has become separated it is noted in this Index.
